

WHAT IS A COMPLETE TRIP?

The 'complete trip' is a concept where transportation trips can be accessed and made in a centralized application. From an agency point of view, complete trip planning allows for various agencies to communicate and coordinate their trips for a more seamless transfer process. From a rider perspective, it provides the ability to create a trip plan with information to navigate various modes of transportation, including but not limited to: pedestrian, transit, road, bike and greenway networks.

Pre-work for **Facilitators**

- Consider your rational and emotional aims for discussing this topic – from **your** perspective, what is your complete trip vision for your state or region?

Questions for Discussion

- What is your vision for a complete trip from the perspective of an agency?
- What is your vision for a complete trip from the perspective from a passenger?
- What scale are you looking at – regional? Statewide?
- What operational factors currently prohibit the facilitation of complete trips?
- Discuss what/how the Summit organizer can facilitate complete trips in your region?
- Discuss other factors that may prohibit passenger's ability to take complete trips:
 - Language barriers
 - Accessibility (ADA)
 - Technology gap
 - Lack of access to technology
- Are there potential partners (who are currently not at *this* table) that could support complete trips in our state/region?
